

From our founder

Anand G. Patil

Do we feel stuck at the current level for long? Are we not able to tap our talent and potential? If our progress is not satisfying then we are stuck where we do not want.

Many such thoughts hound us. Gone are the days when we use to get free advice. If today you open your heart with anyone, we feel vulnerable. We are not sure whether we will be in trouble.

Current market condition and competitive environment push us to the corner wall. We have to run as fast as possible to be at the same place.

Hence the need for self-discovery became very essential. Unless we carve our niche and create opportunities for self; we will not be able to remain in top 20%, 10%, 5% or 1%.

Everyone has their own goals and aspirations. When the world needs our services; are we falling short to fulfill that gap? Huge opportunities are available for us. It is time for us to tighten our seat belts and forge ahead.

Too much data and information available on internet. It is getting difficult to conclude what is useful and what can suit our needs. In case we go other ways then loss is ours. By then competitors may go far ahead.

Our team members are our greatest asset. Do you support them for long term perspective and career?

We definitely need support from Board of Directors and coach to build our capacity, capabilities and management skills.

Connect with us. GAB Consultant will take you to your desired destination with their coaching, consulting and training. We will help you to create sustainable career.
